

Conflict Minerals compliance for an automotive OEM

APA ENGINEERING

— A Class APART —

Setting the context

How APA helped the client

- Creation & timely submission of consolidated CMRT responses
- Meeting NYSC regulations & mandate at a group level

About the Client

A leading automobile manufacturer with a portfolio that includes a wide range of cars, utility vehicles, trucks, buses and defence vehicles.

Global presences in 175 countries

3 holding companies under its fold

Registered in New York Stock Exchange (NYSC)

Problem Area

Getting accurate and timely compliance data from range of suppliers

(Only 50% of suppliers were responsive & providing quality data)

Consolidation of reports at a group level

Preparation & submission of 'Special disclosure report' at a company level to meet security exchange regulations

What was done by APA?

Providing subject matter expertise in populating the questions for the CMRT so that content is easily understood & analyzed by the suppliers who are at different level of compliance maturity

Supplier follow up to get timely & accurate answers

Due diligence and qualitative analysis of the reports received from suppliers and follow up if there are any gaps

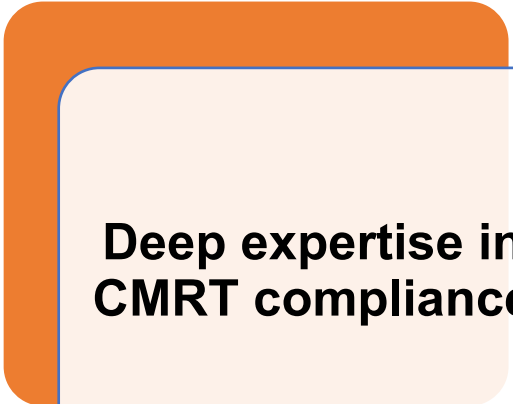

Ensure that OEC guidelines are complied with in the data received from the suppliers

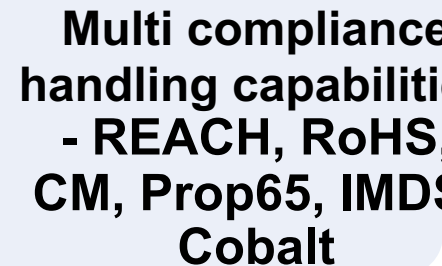

Compiling the CM reports from different holding companies and making it ready for internal approval before submission to NYSC

What made the difference?
